DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-24 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Re claims 1, lines 14-15; claim 7, lines 14-15; & claim 13, lines 13-14, the recitation that "a difference between a first parameter and a second parameter" is compared to "a stored tolerance range" is unclear insofar as the former refers to a single numerical value while the latter refers to a range (which by definition consists of a set of values between two bounding values).

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claims 1-24 are rejected under 35 U.S.C. 112, first paragraph, as based on a disclosure which is not enabling. The following critical or essential to the practice of the invention, but not included in the claim(s) is not enabled by the disclosure. See *In re Mayhew*, 527 F.2d 1229, 188 USPQ 356 (CCPA 1976).

Re claims 1, lines 14-15; claim 7, lines 14-15; & claim 13, lines 13-14 (insofar as they are understood), the disclosure as originally filed does not describe the recited method step or means of comparing a difference between the recited first parameter and the recited second parameter to a stored tolerance range.

Allowable Subject Matter

5. Claims 1-24, insofar as they are understood would be allowable if rewritten or amended to overcome the rejection(s) under 35 USC §112 set forth in this Office action.

The art of record does not teach or suggest the recited arrangement of comparing a difference between the recited first parameter and the recited second parameter to a stored tolerance range in conjunction with the recited image forming monitoring arrangement.
